

EAST LINK LIGHT RAIL Construction Update

August 2010

Daytime Soil Sampling in Your Neighborhood

As early as **Monday, August 16th**, Sound Transit will start soil-sample drilling along the East Link light rail alignment (see map to the right and on reverse). These drillings will help Sound Transit better understand the soil conditions along the East Link light rail corridor. Drilling (indicated by the red dots to the right) will take place at various locations along the proposed route. Sound Transit will work to minimize traffic and pedestrian disruptions.

What to expect

- Drilling equipment will sound similar to a truck engine running with occasional hammering.
- The work will take approximately two days (a boring is about four to 12 inches in diameter) to complete.
- Crews will direct pedestrians, bicycles and motor traffic safely around the drilling area.
- Please contact our 24-hour hotline at 1-888-298-2395 / TTY Relay: 711.

For more information

For more information about the soil-sample drilling or the East Link light rail project or if you are interested in a briefing to your community about the project, please contact Emily Mannetti at 206-398-5438 or emily.mannetti@soundtransit.org.

Example of test drilling equipment

Sound Transit's East Link light rail project will run from downtown Seattle across Lake Washington on I-90 to stations at Mercer Island, south Bellevue, downtown Bellevue, Bel-Red, and Redmond's Overlake area. With the completion of the Sound Transit 2 expansions in 2023, it will be part of a regional light rail system stretching 55 miles. The East Link line will serve 40,000 – 45,000 daily riders on one of the region's most congested travel corridors by 2030. Current East Link project information can be found on Sound Transit's Web site at www.soundtransit.org/eastlink.

Sound Transit plans, builds and operates regional transit systems and services to improve mobility for Central Puget Sound. For information in alternative formats, call 1-800-201-4900 / TTY Relay: 711 or e-mail accessibility@soundtransit.org.

East Link Light Rail Preferred Alternative

Updated Preferred Alignment

On July 22, 2010 the Sound Transit Board recommended two routes through south Bellevue (Options 2 and 6). Both routes would utilize Bellevue Way and 112th Avenue SE and run on the westside of the street north of SE 8th St. Option 2 would enter a tunnel on Main St. and Option 6 would run at-grade onto Main St. For more information or to schedule a briefing in your community, please contact Emily Mannetti at 206-398-5438 or emily.mannetti@soundtransit.org.

To speak with Sound Transit about the proposed Link light rail mass transit project in East King County call 1-800-823-9230 during regular business hours.
